## training

### Bachelor of Fine Arts, Visual Communications

American Academy of Art, Chicago Dec. 2008

- President's List Spring 2008
- Guest Lecturer, *Designing for iOS*, Fall 2011

Participated and attended Colin Mook's Actionsript 3.0: *From The Ground Up Tour*, presented by Adobe in Chicago 2008

Member of the Society of Typographic Arts & AIGA –Chicago 2005-2008

## experience

### Walgreen Co., Chicago

*Lead iOS Developer 2013–Present*

At Walgreens I focus on innovation, creating high-fidelity proof of concepts, and expanding our patent portfolio for mobile. In my tenure at Walgreens I have established key relationships with strategic partners and have traveled to support the business when needed. I've been fortunate to represent my company at numerous major tech conferences, that I had only dreamed of attending a few years earlier.

- Digital Engineering & Mobile Solutions MVP Award
- eCommerce MVP Award, Abhi Dhar, CTO eCommerce

### JustFamily, Inc, Chicago (Remote)

*iOS Developer 2012–2013*

Brought on to JustFamily in the summer of 2012 to aid in iOS development, during my time there I worked on and released numerous versions of the their flagship iPhone app. Worked closely with remote team members to complete tasks, review and track bugs, and brainstorm future product features and offerings.

- Also spearheaded my first OSX App for uploading photos to JustFamily.

### Freelance, Nicholas L. Eby, Chicago

*Freelance iOS Developer / Web Developer, 2009–2012*

#### Projects of note:

more cupcakes, Chicago

*Freelance iOS Developer, Web Developer*

Hired to design and develop more's iPhone & iPad app, as well as improve upon their existing website and product ordering frameworks. Project challenges included: incorporating real-time GPS tracking results into their app to highlight their flagship mobile food truck, incorporate app orders into their existing online ordering system while maintaining a consistent ordering number throughout both platforms.

- Worked closely with food photographer & stylists to coordinate media assets for the app.

Verde L3C, Chicago

*Freelance iOS Developer, Web Developer*

Developed Verde's iPad app to measure users current electricity consumption, which compares user inputted results to a database to display and recommended green alternatives products. Project challenges included using users geo-location to determine user's home zip code in which I was able to use a custom API to retrieve the users electricity rate.

- Incorporated algorithms to convert annual energy consumption into metric tons of CO2 to display annual carbon footprint.

## experience cont.

Jacobs & Clevenger, Chicago

*Freelance iOS Developer, Mobile Web Developer*

J&C hired me to develop an iOS app for one of their leading Chicago-land client's, REBAC, which gives users access to home buyer resources, finance calculators, marketing tips and articles from Today's Buyer's Rep. Project challenges included working with clients IT team to determine best method to authenticate app users to their secure database.

Alliance for Coastal Technologies (ACT), Maryland

*Freelance Web Developer, Flash Developer*

Worked with ACT to develop Flash and HTML web interfaces to work in conjunction with their existing FileMaker databases to graphically display marine sensor and shipping port results.

ICM, Inc., Chicago

*IT Consultant, 2009–2011*

While working for ICM my job consisted of many things, from computer & server management, on-site computer and mobile technical support, to development of the companies website and iPad app. I also created custom frameworks for client file distribution and job proposal submittals.

Matte Black Studios., Chicago

*Web Developer, iOS Developer, 2010*

While working for Matte Black Studios I spent most of my time doing front-end web development for an assortment of clients, using traditional web technologies with server-side interaction.

Perennial Strategy Group, Washington D.C.

*Web + Graphic Designer, Web Developer 2008-2010*

The work that I did for Perennial allowed me to develop XHTML-based web sites that utilized rich media content like Flash to assist in usability, functionality and overall aesthetics. My experiences as a graphic designer allowed me to further my clients brand awareness by designing print pieces that mimicked the look and feel of the web sites.

- Produced various XHTML web sites and RSVP applications for the web and incorporated use of popular medias such as Flash and YouTube®. Set-up SWF files that took advantage of Local Connection, allowing communication between two SWF files on the same domain.
- Utilized Dreamweavers's dynamic development PHP with MySQL databases to set up dynamic web pages and moderated and organized data collected from sites
- Created print work including event credentials, flyers and mailers
- Worked closely with clients to set up the capabilities to send Mass E-mail through a third-party vendor.
- pwap2008.com, perennialinauguration.com, perennialse.com, perennialsg.com,

American Academy of Art Inc., Chicago, IL

*Computer Lab Monitor 2008-2010*

- Responsible for overseeing daily use of campus computer lab, administrating software and hardware updates /installs, and fielding computer-related questions.
